FCC - Please do not give-in to the NAB petition #04-160! Please give XM satellite radio a chance to service the public what the public wants. I'm just one of many that willingly pay a monthly charge to listen to what I want, rather than endure a lot of what I don't want with conventional radio. What makes America great is it's innovative thinking. Satellite radio is just another good idea that shouldn't be crushed just because its a wake up call for the old system to get with the program and offer what the public wants. Competition is what give America an edge on the rest of the world.

Thank you,

Sam
